

PRESS RELEASE

www.ocon.com – an all new webpage

With the 120EX fluid head, OConnor Engineering launches their new webpage

During the opening of the CINEC trade show in Munich – Germany, OConnor Engineering launched their new website. Coinciding with the unveiling of the new 120EX fluid head – featuring the new EX-technology, Product & Marketing Manager Ali Ahmadi announced the new webpage.

“We are launching the new 120EX fluid head, and together with this new fluid head we are giving OConnor a new presence on the web”, says Ahmadi. Replacing the previous webpage, the new webpage features easier navigation and much more information.

“We already have more information on this new website available right now, but we will take this much further.” Projects at OConnor are already well on their way to provide even more information and better support to current and future users and owners of OConnor equipment. The webpage at www.ocon.com will continually be updated.

To keep up with these and other news from OConnor a OConnor newsletter will feature regular updates; to sign up for the OConnor newsletter please visit www.ocon.com

OConnor Engineering is the most chosen manufacturer for fluid heads in film industry. Located in Costa Mesa, California the proximity to Hollywood allows OConnor to provide tools ideally suited for the demands of cinematographers.

OConnor Engineering is a company of the Vitec Group plc.

Through the Group's companies, the Vitec Group provides equipment and services to the broadcast, entertainment and photographic industries. All Vitec Group companies are leaders in their markets - supplying innovative products and services for industry professionals throughout the world.
