

OConnor

30L Carbon Fiber Tripod

With the 30L Carbon Fiber Tripod OConnor replaces the legacy 25L & 35L lines of tripods. Combining the benefits of new-age materials with precision engineering has created a support system which is both lightweight, yet solid and stable, an ideal fit for the new generation of smaller new Ultimate 1030 D & 1030 Ds Fluid Heads.

At just 8.8 lbs (4 kg) the 30L's double extension design ensures it can safely and stably carry payloads of up to 209 lbs (95 kg) even at its maximum height of 63.4" (161 cm). And the 30L is versatile. Despite its generous height range, it folds down to a mere 29.5" (75 cm) for convenient travel. A smart quick clamping system offers secure and visible tripod lockdown. The system's integral spreader system offers easy trouble-free security. Removable rubber feet expose spikes for optimal traction and payload safety on a variety of surfaces.

OConnor's new 30L tripod system features an expanded payload range in a lightweight package that makes it the perfect companion for the new 1030D and 1030Ds Ultimate Fluid Heads.

30L Specifications

Model:	30L
Type	2-stage tripod
Material:	Carbon Fiber
Capacity	209 lbs (95 kg)
Weight	8.8 lbs (4 kg) (tripod only)
